

A simple guide to RSN online spreadsheets - Road Length Quick Lookup

The Road Length Quick Lookup uses data from the Department for Transport, and shows the total road length at a local authority level by road type (2014 data). It shows the road length for both the chosen local authority and its region, both within a table and graphically through a bar chart.

To use the spreadsheet, please follow these steps:

1) Using the mouse, select the cell containing a local authority name and highlighted by having a black boxed perimeter.

2) To the right of the chosen cell, a grey square with a blue triangle appears. Clicking on this presents the full list of options available.

I hope this helps. If you have any comments or suggestions, please contact dan.worth@sparse.gov.uk
